

Voluntary Product Accessibility Template

Name of Product: 2Know! Classroom Response System™

Company: Renaissance Learning™

Criteria	Supporting Features	Remarks and Explanations
Section 1194.25 Self Contained, Closed Products		
(a) Self-contained products shall be usable by people with disabilities without requiring an end-user to attach Assistive Technology to the product. Personal headsets for private listening are not Assistive Technology.	Full Support	The 2Know! Classroom Response System provides access to students with disabilities by providing large, single-purpose buttons and offering adjustable font sizes for on-screen text. In addition, the 2Know! Classroom Response System does not provide auditory output that would require the use of Assistive Technology to operate the product.
(b) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	Full Support	The 2Know! Classroom Response System has two types of sessions in which students enter responses. In a teacher-paced session, CRS provides full discretion to teachers in determining the amount of time a student has to enter a response. Extra time is easily granted as needed. In a student-paced session, CRS enables each student to enter responses at their own pace to ensure students with disabilities have sufficient time to complete their work.
(c) Where a product utilizes touch screens or contact-sensitive controls, an input method shall be provided that complies with §1194.23 (k)(1) through (4).	Not applicable	The 2Know! Classroom Response System does not use touch screens.
(d) When biometric forms of user identification or control are used, an alternative form of identification or activation, which does not require the user to possess particular biological characteristics, shall also be provided.	Not applicable	No biometric forms of user identification or control are used in the activation of the 2Know! Classroom Response System.
(e) When products provide auditory output, the audio signal shall be provided at a standard signal level through an industry standard connector that will allow for private listening. The product must provide the ability to interrupt, pause, and restart the audio at any time.	Not applicable	The 2Know! Classroom Response System does not provide auditory output.
(f) When products deliver voice output in a public area, incremental volume control shall be provided with output amplification up to a level of at least 65 dB. Where the ambient noise level of the environment is above 45 dB, a volume gain of at least 20 dB above the ambient level shall be user selectable. A function shall be provided to automatically reset the volume to the default level after every use.	Not applicable	The 2Know! Classroom Response System handheld responders do not deliver auditory output.
(g) Color-coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Full Support	Color is not used as the sole means for conveying information with the 2Know! Classroom Response System.

(h) When a product permits a user to adjust color and contrast settings, a range of color selections capable of producing a variety of contrast levels shall be provided.	Not applicable	Color and contrast settings are not adjustable on the 2Know! Classroom Response System handheld responders.
(i) Products shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Full Support	The 2Know! Classroom Response System handheld responder does not flicker with a frequency greater than 2 Hz and lower than 55 Hz.
(j.1) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: The position of any operable control shall be determined with respect to a vertical plane, which is 48 inches in length, centered on the operable control, and at the maximum protrusion of the product within the 48 inch length on products which are freestanding, non-portable, and intended to be used in one location and which have operable controls.	Not applicable	
(j.2) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Where any operable control is 10 inches or less behind the reference plane, the height shall be 54 inches maximum and 15 inches minimum above the floor.	Not applicable	
(j.3) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Where any operable control is more than 10 inches and not more than 24 inches behind the reference plane, the height shall be 46 inches maximum and 15 inches minimum above the floor.	Not applicable	
(j.4) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Operable controls shall not be more than 24 inches behind the reference plane.	Not applicable
