

Students thrive with the right amount of struggle.

Renaissance Accelerated Math[®] helps provide powerful practice to drive growth.

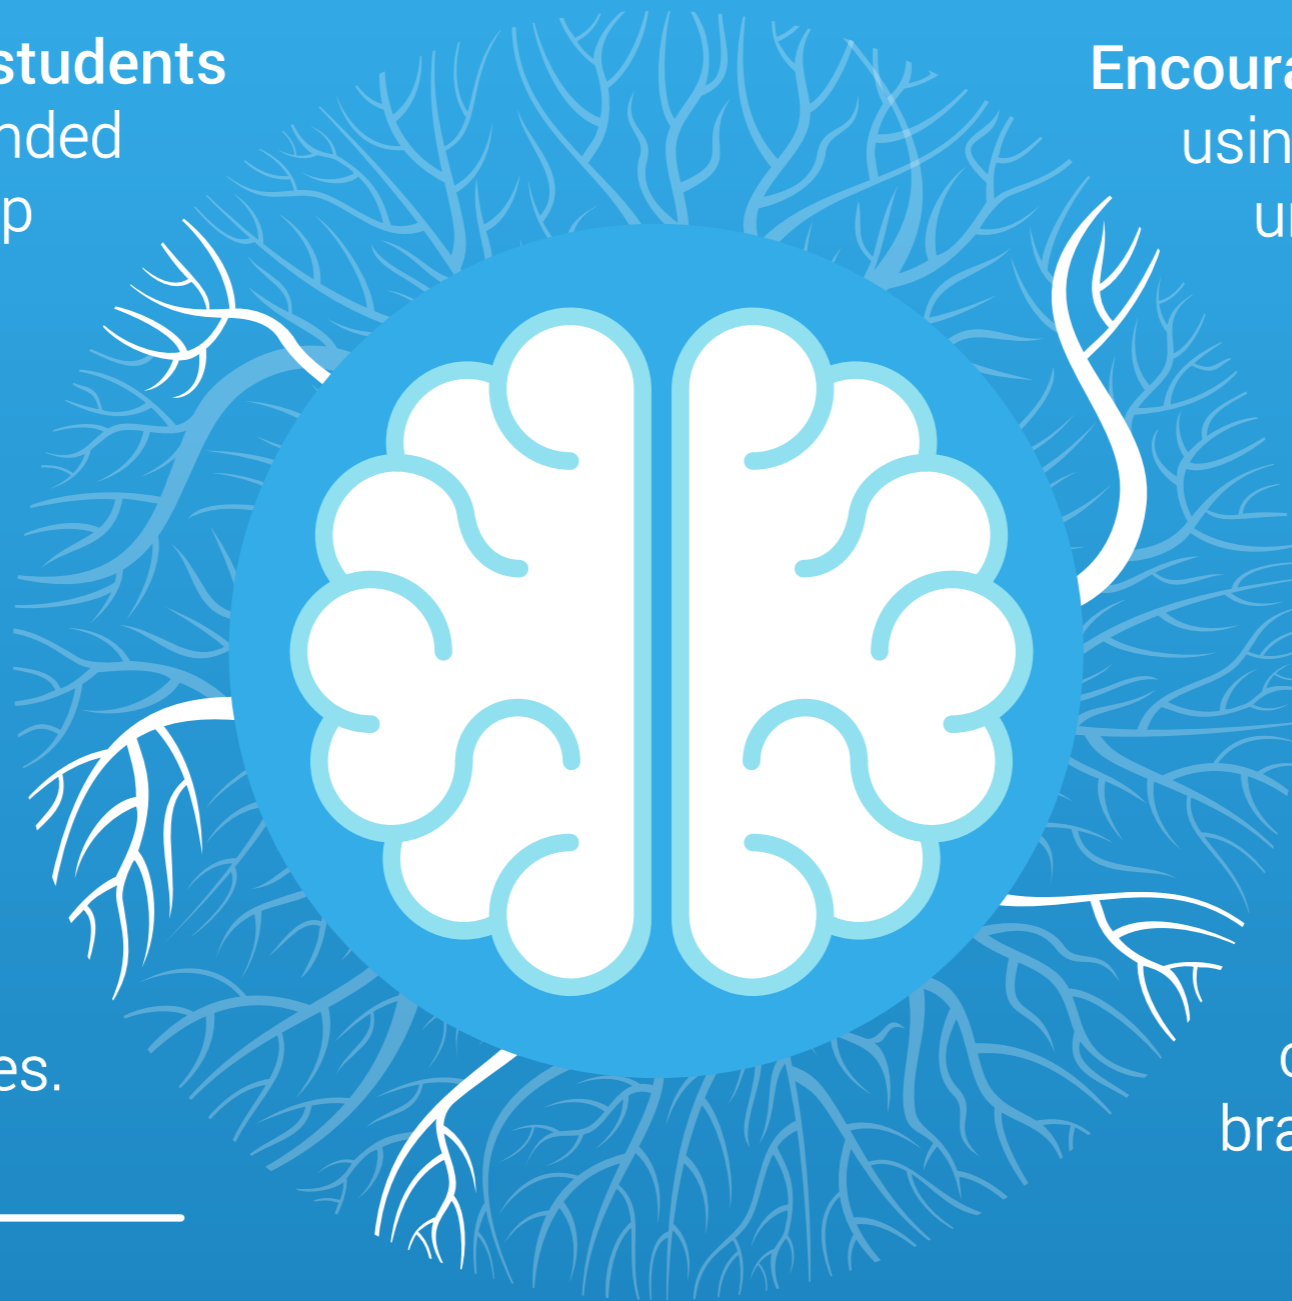

Conference with students and ask open-ended questions to help them practice critical thinking and build new strategies.

Give immediate feedback after each assignment and allow students time to reflect on their mistakes.

Praise students for their effort in making sense of a problem to help develop perseverance.

Encourage collaboration using tailored assignments unique to each student, so they can discuss and justify their strategies without copying their peers' answers.

Allow ample time for deep practice to rewire and strengthen connections in students' brains.
